Executive summary

Legal Balance is a company operating in Lithuania and Latvia working as a receivables management company specializing in collection and purchasing of non-performing private consumer debt portfolios.

Our clients are major telecommunications companies, banks, sports clubs and finance companies.

We are a preferred partner of EOS Global Collection network.

Our personnel is a team of passionate, ambitious and professional individuals. We manage to achieve outstanding results. We do not work with clients, we work for their interests and goals they want to achieve.

Investments into debt purchase

Debt portfolios are purchased for 10 – 70 % of the debt amount through auctions organised by sellers usually operating in financial, telecommunications and utilities sector. Acquisition price is determined through modeling projections of portfolio using historical data and benchmark portfolios. Cashflows projections are made 10 years into the future, acceptable investment project **IRR threshold – 20%**.

Shareholders actively participate in the business, with the goal of keeping equity ratio no less than **20%**.

Business environment

According to the data of the Bank of Lithuania, the amount of overdue consumer credits >90 days in Q1 2024 amounted to 84,1 mEUR (+24% YoY). Due to limited resources, financial institutions very often hand over insolvent clients to debt collection specialists for administration, and at a later stage to get rid of NPLs by selling them with discount to such companies as Legal Balance.

The difficult inflationary environment and high interest rates are likely to further increase the number of customers who will find it increasingly difficult to meet their financial obligations. The company expects to be able to expand its customer base and increase investments during this period.

Profitability and investments (LT)

The largest share in the company's income structure (>70%) is the income from purchased debts.

The growth of investments in bad debts and the growing portfolio of managed debts continuously leads to better company results. The company collects significantly more receivables from borrowers than planned, which directly affects higher EBITDA and pre-tax profit numbers.

Financials (Profit-loss)

The company's income growth was driven mainly by investments in NPL portfolios and the expanding number of clients for servicing.

Cost of sales includes legal and enforcement costs, which increase as the amount of claims under management increases.

EBITDA and EBIT numbers are nearly identical because the company has insignificant depreciation costs.

Decreased profitability was mainly influenced by two things: increased interest costs (due to the situation in the capital markets) and increased operating costs (higher processing costs are required for a large amount of new debt portfolios).

Profit loss statement, th Eur	2020	2021	2022	2023	2024 H1*

Financials (Balance sheet)

The largest part of the company's assets consists of purchased debt portfolios, which are accounted for using the amortized cost and effective interest rate method.

In order to maintain an optimal capital structure, the company invests in debt by consistently borrowing in the form of bonds. The company aims to maintain an equity ratio of at least 20%

Company's other liabilities include mainly amounts due to sellers of debt portfolios.

Legal Balance is top of the class in terms of both leverage and return on equity, ready to embrace the period of opportunities that lies ahead. As the NPL industry is facing rough times ahead in an environment of rising interest rates, our balance sheet has spare capacity to invest in high-yielding portfolios of assets. As many of our peers struggle with refinancing, our debt maturities are currently matched with projected inflows from our NPL portfolio.
